

Seedy Saturdays coming up!!

To all the gardeners out there, please start saving your seeds for trading at the Seed Swap in 2024. Believe it or not it's the 20th Anniversary of Seedy Saturday! We'd like to make it particularly special this year. To do that we'd like to have as many as possible saving their seeds to make a full on comeback to the Seedy events of pre Covid where we had an abundance of seed to trade and sell. So please go to the websites below if you need some advice on how to save seeds, ask your fellow gardeners and/or check out your local Library.

All seeds are welcome, from annuals, perennials, shrubs, trees, grasses and veggies - particularly veggies!. Our only request is that they are no more than two years old and are not commercially packaged seed. We so look forward to seeing everyone at Seedy Saturday and we look forward to swapping seeds and stories with you.

And as always if you have seeds but can't attend you can donate some to Seedy Saturday to re package and provide a selection of seeds on our trade in table to start the day off.

Many thanks.

Kim Hammond
