

## INSPECT-A-GADGET

Well, fellow members, here are the last two submissions of favourite gardening gadgets. Thanks to everyone who shared their true loves, and helped to lift the rest of us out of the Stone Age.  
p.s. Although Annabel's Twizzler is not a gadget in the typical sense, it's a very pretty reminder to all of us that gardening should be fun!

### Linda Patterson's Right Hand

#### Why she loves it:

- Unlike Shirley K's hand-held rake, Linda's does not have a wrist support. But it DOES have an adjustable head size. Because the tines are retractable, it can get in and around Linda's plants.
- It's super light so Linda easily carries it whenever she gardens.
- She uses it to clean the beds of leaves and debris, and to rake newly planted soil.
- Her kids now use them too, so it's clear proof that 'mother is always right'.

#### Where you can get it:

- Linda got hers from Lee Valley years ago. They no longer sell it, but you can find one on Amazon.

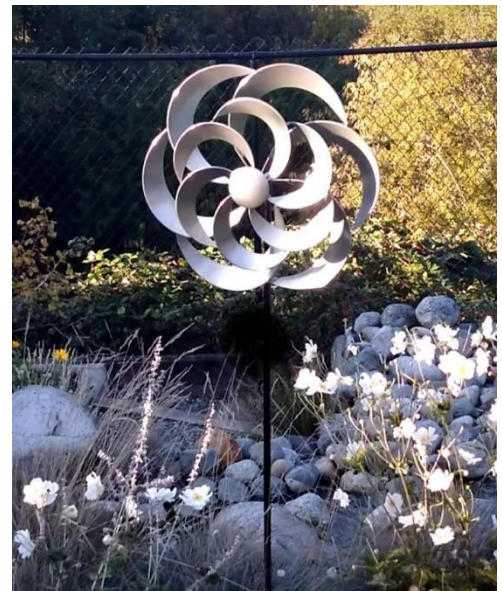

### Annabel Rogers' Smile Maker

#### Why she loves it:

- The circular vanes catch every little puff of air. They spin in opposite directions, enhancing the amount of movement.

#### Where you can get it:

- Annabel fell in love with the Twizzler at the RHS gardens at Wisley, England. When she came to pack it for the journey home, it was about 2 inches too big for her suitcase. She had to borrow a bigger suitcase to bring it home.
- She says that her Twizzler was well worth the expense and the trouble!
